

**ODISHA NURSES & MIDWIVES EXAMINATION BOARD
SECOND YEAR ANNUAL EXAMINATION IN A.N.M. -2020**

**Paper- V
(Midwifery)**

Time: 3 hrs

Full Marks: 75

Answer all the Questions.

Figures in right hand margin indicate marks.

1.
 - a. What is antenatal care? [3]
 - b. How you provide antenatal care at home? [6]
 - c. What advice you will give to get a healthy child from a healthy mother? [6]

OR

 - a. What is labour? [2]
 - b. What are the signs and symptoms of labour? [3]
 - c. How you conduct a delivery at home? [5]
 - d. What are the safe techniques to use while conducting delivery? [5]
2.
 - a. What is growth and development? [4]
 - b. What are the factors responsible for growth and development? [5]
 - c. As a HW(F) how you assess the growth and development of a child? [6]
3. Write three point answers to each of the following [3x5]
 - a. Indication of CS
 - b. Features of premature newborn
 - c. Clinical features of preeclampsia
 - d. Write the group of drugs used in obstetrics
 - e. Congenital anomalies in newborn are
4. Write short notes on any three of the following. [3x5]
 - a. Role of Dai
 - b. Referral services
 - c. Normal puerperium
 - d. Abortion
 - e. Breast feeding
5. Fill in the blanks [1x5]
 - a. Ovulation occurs _____ days before the next menstruation
 - b. There are _____ no of pelvic bones
 - c. If pregnancy occurs in fallopian tube, it is called _____
 - d. Use of condom prevent _____ disease
 - e. Umbilical cord has _____ arteries _____ veins

6. Mark True or False against each statement [1.5]
- a. Anterior fontanel closes in 18 weeks
 - b. MTP Act is launched in 1975
 - c. Low birth weight baby is less than 2.5.Kg
 - d. Post natal mother should take adequate water
 - e. High blood pressure in pregnancy is a sign of hyper emesis gravidarum

7. Write the full form of the following [1x5]
- a. COC
 - b. PPH
 - c. ARM
 - d. CPD
 - e. MMR

ANM-S-2-V-2019

SECOND YEAR SUPPLEMENTARY EXAMINATION IN A.N.M. -2019
ODISHA NURSES & MIDWIVES EXAMINATION BOARD

Paper- V
(Midwifery)

Time: 3 hrs

Full
Marks: 75

Answer all the Questions.

Figures in right hand margin indicate marks.

1.
 - a. Define antenatal care. [2]
 - b. Explain the minor ailments of pregnancy. [5]
 - c. As a H.W.(F), What care and advice will you give to an antenatal mother. [8]

OR

 - a. What is a high-risk pregnancy? [2]
 - b. Describe the risk factors for identification of High-risk pregnancy. [5]
 - c. As a H.W.(F), what care and counselling will you give to a High-risk mother. [8]
2.
 - a. Define antepartum haemorrhage. [2]
 - b. Explain the different types of placenta praevia. [5]
 - c. As a H.W.(F), what care will you give to a mother with placenta praevia. [8]

OR

 - a. What is puerperal sepsis? [2]
 - b. What are the causes, signs & symptoms of puerperal sepsis? [5]
 - c. As a H.W.(F), how will you manage a post-natal mother with puerperal sepsis. [8]
3. Write short notes on any three of the following. [3 X 5= 15]
 - a. Partograph
 - b. Induction of labour.
 - c. Infertility
 - d. Oxytocin
 - e. Anaemia in pregnancy
4. (A) As a H.W.(F), what are your immediate roles and responsibilities in the following situation. [2X5 =10]
 - a. A pregnant mother with severe vomiting.
 - b. A new-born baby with axillary temperature 35°C.
 - c. An antenatal mother with HIV positive.
 - d. An antenatal mother at 8 weeks of pregnancy with bleeding per vagina.

ANM-S-2-V-2019

e. A postnatal mother with engorged breast.

(B) Fill in the blanks with appropriate words.

[1 X 5 = 5]

- a. Ovulation occurs _____ days prior to menstruation.
- b. Perception of active foetal movements by mother is called _____.
- c. Ask the antenatal mother to empty her _____ for an abdominal examination.
- d. The maintenance dose of $MgSO_4$ in eclampsia is _____ grams Intramuscular every 4 hourly.
- e. The most suitable pelvis for normal delivery is _____ pelvis.

5. (A) Mark True or False against each statement.

[1 X 5 = 5]

- a. The duration of 3rd stage of labour in primigravida is one hour.
- b. Umbilical cord has 2 veins and one artery.
- c. Abortion is the expulsion of foetus before the period of viability.
- d. Haemoglobin should be tested at every visit for a pregnant woman.
- e. Folic acid is given to the antenatal mother to prevent bleeding.

(B) Write the full form of the following abbreviations.

[1 X 10 = 10]

- a. PPIUCD
- b. CCT
- c. BFHI
- d. LSCS
- e. IVF
- f. RVF
- g. CPD
- h. ECP
- i. PPH
- j. STD

- (d) Rights of women
- (e) Lower segment caesarian section (LSCS)

4. A. As a H.W (F) what are your immediate roles and responsibilities in dealing with the following situations. [2 x 5]

- (a) A woman having abortion
- (b) A mother with puerperal sepsis
- (c) A mother having breast engorgement
- (d) A woman with pre-eclampsia
- (e) A woman having syphilis

B. Fill in the blanks with appropriate words: [1 x 5]

- (a) When the duration of first stage of labour is more than ----- hours is called prolonged labour.
- (b) The fertilized ovum implants outside of the uterus is known as ----
- (c) Isthmus is part of -----
- (d) Perceptions of active fetal movements by mother is -----
- (e) Overlapping of bones in fetal skull during birth is called ----

5. A. Mark True or False against each statement: [0.5 x 10]

- (a) Ovulation occurs 14 days prior to menstruation.
- (b) Anterior frontanelle is also called Lambda.
- (c) Umbilical cord contains two arteries and one veins.
- (d) Obstetrical emergency is hyperemesis gravidarum.
- (e) Membrane space which separate fetal skull bones called suture.
- (f) Average amount of amniotic fluid is 500-1500 ml.
- (g) Normal heart rate of new born is 160-180 beats/min.

P.T.O.

- (h) Endo metrium of the pregnant uterus is termed as morula.
- (i) Nurses assess post partum hemorrhage checking mothers pad.
- (j) Embryo is developing offspring till six weeks of implantation.

B. Write down the full form of the following abbreviations: [0.5 x 10]

- (a) V E
- (b) VVF
- (c) PID
- (d) IUGR
- (e) HBV
- (f) IVF
- (g) CPD
- (h) IGWPS
- (i) MVE
- (j) ART

C. Mark Tick in the right answer only : [0.5x 10]

- (i) When should you preferably count the FHR ?
 - (a) Immediately after uterine contraction
 - (b) During uterine contraction
 - (c) Just before a uterine contraction
- (ii) Which of the following is an indicator that needs referral to an FRU ?
 - (a) FHR 140 beats/ min
 - (b) Meconium stained liquor
 - (c) Temperature 37°C
- (iii) The expected date of delivery (EDD) can be calculated by ----
 - (a) LMP + 9 months + 7 days

P.T.O.

- (b) LMP + 7 months + 9 days
(c) LMP + 4 months + 9 days
- (iv) The supplement that helps in reducing the incidence of neural tube defects in the fetus is -----
(a) IFA
(b) Calcium
(c) Folic Acid
- (v) The normal body temperature of a new born is -----
(a) 36° to 36.5° C (b) 36.5° to 37.5° C (c) 37° to 37.5° C
- (vi) What is the maintenance dose of MgSO₄ in eclampsia ?
(a) 2 gms in diluted with 6ml distilled water
(b) 4 gms 1m every 6 hourly
(c) 5 gms 1m every 4 hourly
- (vii) While preparing for an abdominal examination, ask the antenatal mother to
(a) Empty bladder
(b) Lie left lateral position
(c) Have a full bladder
- (viii) Fetal Heart starts beating during fetal development period of
(a) After 4 weeks (b) After 8 weeks (c) After 3 weeks
- (ix) Cervix is considered fully dilated when
(a) It is 10 cm dilated
(b) It is 4 cm dilated (c) It is 14 cm dilated
- (x) One of the following is mal presentation
(a) Cephalic (b) Vertex (c) Breech

Odisha Nurses & Midwives Examination Board
Second Year Examination for A.N.M./H.W (F)

Paper -V

(Midwifery)

Time : 3 hrs

Full Marks : 75

Answer all questions.

Figures in right hand margin indicate marks.

1. (a) Define labour and stages of labour. [5]
(b) Prepare a labour room and equipment for conducting delivery. [5]
(c) Provide nursing care to a woman in 3rd and 4th stage of labour. [5]

Or

- (a) What is Lochia and write down its types. [5]
(b) Describe the management of puerperium. [5]
(c) Educate the mothers on various methods of Family Planning. [5]
2. (a) State the meaning of high risk pregnancy. [2]
(b) Enlist high risk pregnancies and the factors of high risk pregnancy. [6]
(c) Describe the role of Health Worker to prevent high risk pregnancies. [7]

Or

- (a) What do you mean by high risk new born ? [2]
(b) Explain the causes and clinical features of preterm infant. [6]
(c) As a Health Worker how will you manage a new born having hypothermia. [7]
3. Write short notes on any THREE of the following: [5 x 3]
(a) Antenatal care
(b) Oxytocin and nurses responsibilities
(c) Post partum Hemorrhage (PPH)

P.T.O.

Indyr AMM

Annual Examination - March -2018
Odisha Nurses and Midwives Examination Board
Second Year Examination for A.N.M/H.W (F)

PAPER - V

Midwifery

Answer all questions.

The figures in the right hand margin indicates marks.

Time :3 hours

Full Mark – 75

1. **A primi gravida women admitted in the labour Room with pain.** (2+5+8=15)
a) Define labor & the stages of labour
b) Differentiate between true and false labor.
c) As a H.W (F) how will you manage in 2nd stage of labour and what are the possible complications of 2nd stage of labor.
- OR
- a) Develop the objectives of antenatal care. (5+4+6=15)
b) Prepare the pregnant woman for abdominal and vaginal Examination.
c) Explain the management of minor disorders of Pregnancy.
2. a) State the definition of Puer Perium & involution. (5+5+5=15)
b) Provide care to mother and baby during post partum period.
c) Educate the mothers on various methods of family planning.
- OR
- a) State what is Eclampsia (2+8+5=15)
b) Describe the management of Eclampsia.
c) Educate the mothers about prevention of Eclampsia.
3. **Write Shorts notes of the following any THREE of the following.** (3x5 = 15)
a) Episiotomy
b) Safe mother hood
c) Puerpural sepsis
d) Lochia
e) Patograph
4. **A - As a H.W (F) What are your immediate roles and responsibilities in dealing with the following situation.** (2x5=10)
i) A new mother unable to breast feeding the baby.
ii) A women with infertilitis having domestic violence.
iii) A baby born with meconium stain and absence of cry.
iv) A woman with 8wks pregnancy having bleeding per vagina.
v) A new born baby under phototherapy.
- B - Fill in the Blanks with appropriate words.** (1x5=5)
i) Caput succedenum disappears with in _____hrs
ii) Endometrium of Pregnant uterus is termed as _____
iii) A fully dilated cervix is _____ cm in diametre.
iv) Pap smear for detection of _____ cancer.
v) pregnancy occurs other than utreus is known as _____

5. A - Mark 'True' or 'False' against each statement.

(1/2x10=5)

- i) Oxytocin is used to induced labor pain.
- ii) Umbilical cord consist of 2veins & 1artery.
- iii) Trans verse lie is commonly associated with obstructed labour.
- iv) Foul smelling lochia is not a typical finding of purpural sepsis.
- v) If a woman is HIV positive, all her babies would be HIV Positive as they share the same blood.
- vi) Cord Prolapse is an obstetrical emergency
- vii) Hemoglobin should be tested at every visit for a pregnant woman.
- viii) Perception of fetal movement is called lightening.
- ix) Isthmus is part of uterus.
- x) Moulding disappears after delivery.

B - Write down the full form of following abbreviations.

(1/2x10= 5)

- i) SROM
- ii) LSCS
- iii) CCT
- iv) MTP
- v) MCTS
- vi) VCTC
- vii) PPIUCD
- viii) AMTSL
- ix) BEOC
- x) WIFS

B - Match the appropriate word of column "A" with "B".

(1/2x10= 5)

A

- Shortening & thining of cervix
- Head arrest
- PPH
- Dystocia
- Infertility
- AIDS
- Pelvic Grip
- Abortion
- craniotomy
- Fetal Heart beat

B

- After 4 weeks of pregnancy
- obesity
- 28 weeks of Pregnancy
- Destructive surgery
- Forcep delivery
- Four in Number
- Low BP
- Difficult labour
- ELISA TEST
- Cervical effacement
- 10 weeks of Pregnancy

- b) Apgar score
- c) Low birth weight baby
- d) Anaemia in pregnancy
- e) R.T.I & S.T.I

4.A) Write the full form of following abbreviations [1×10]

- a) ART
- b) FRU
- c) K M C
- d) E B F
- e) BFHI
- f) IFA
- g) AMTSL
- h) ICTC
- i) PROM
- j) CPD

B) Fill up the Blanks [1×5]

- a) Ovulation occurs after _____ days of menstruation.
- b) Use of condom Prevent _____.
- c) Fundal height at the level of umbilicus indicate _____ week of pregnancy
- d) Partograph is used at the time of _____.
- e) Normal heart rate of new born is _____.

5.A) Mark true or false against each statement [1×5]

- a) First foetal movement felt by mother is called partograph.
- b) High blood pressure in pregnancy is a sign of Hyperemesis Gravidarum.

- c) The most suitable pelvis for normal delivery is Gynecoid pelvis.
- d) Normal quantity of amniotic fluid is 1500ml.
- e) Umbilical cord have 2 veins and one artery.

B) Match column 'A' With Column 'B' [1×10]

Column 'A'	Column 'B'
a) Regular Contraction	a) Dead Foetus
b) Placenta Praevia	b) Mal Presentation
c) Meconium Stain	c) True Pain
d) Craniotomy	d) Painless uterine bleeding.
e) Cord Prolapse	e) Foetal distress.
f) Retained Placenta	f) 9.5 cm
g) Anaemia	g) Less than 300ml
h) Biparietal diameter	h) IFA Tablet
i) Oligohydramniotic	i) Uterine inertia
j) Hypothermia	j) New born baby.

ANNUAL EXAMINATION,
ODISHA NURSES AND MIDWIVES EXAMINATION BOARD
SECOND YEAR EXAMINATION FOR A.N.M/H.W(F)
PAPER V
MIDWIFERY

Time : 3 Hrs.

F.M - 75

Answer all questions

The figures in the right hand margin indicates mark.

1. (a) Define abortion [3+6+6]
(b) Enlist the types of abortion
(c) As a H.W(F) explain the management of threatened abortion.

Or

- (a) what is early registration of Pregnancy. [3+6+6]
(b) Explain briefly minor ailments during Pregnancy.
(c) As a H.W(F) how will you Provide Care to Antenatal mother.

2. (a) Define Eligible Couple [3+5+7]
(b) Describe briefly the natural methods of Contraception.
(c) Write the role of A.N.M in family welfare Programme.

Or

- (a) What is Puerperal sepsis [3+5+7]
(b) What are the causes of puerperal sepsis
(c) As a H.W(F) how will you manage the puerperal sepsis of postnatal mother

3. Write short notes on: any three of the following [5+5+5]
a) Ectopic Pregnancy

3 a) What do you mean by high risk mother? [2+5+8]

b) List out who are high risk mothers.

c) As a H.w(F) write down how will you manage the high risk mothers.

କ) ବିପଦ ସଂକ୍ରମ ମା' କହିଲେ କ'ଣ କୁଝ ?

ଖ) ବିପଦ ସଂକ୍ରମ ମା ମାନକର ତାଲିକା ପ୍ରସ୍ତୁତ କର ।

ଗ) ଜଣେ ମହିଳା ସ୍ୱାସ୍ଥ୍ୟ କର୍ମୀ ଭାବରେ ବିପଦ ସଂକ୍ରମ ମା' ମାନକର କିପରି ଯତ୍ନ ନେବ ଏବଂ manage କରିବ ।

4. a) What is puerperal sepsis. [3+6+6]

b) What are the causes of puerperal sepsis.

c) Write the sign symptoms of puerperal sepsis. As a female health worker how will you manage the puerperal sepsis of postnatal mother.

କ) ପ୍ରସବରୋତ୍ତର ସଂକ୍ରମଣ କ'ଣ ?

ଖ) ପ୍ରସବରୋତ୍ତର ସଂକ୍ରମଣର କାରଣ କ'ଣ ଏବଂ ଏହାର ଚିହ୍ନ ଓ ଲକ୍ଷଣ ଗୁଡ଼ିକ ବର୍ଣ୍ଣନା କର ।

ଗ) ଜଣେ ମହିଳା ସ୍ୱାସ୍ଥ୍ୟ କର୍ମୀ ଭାବରେ ପ୍ରସବରୋତ୍ତର ମା'ର ସଂକ୍ରମଣକୁ କିପରି ପରିଚାଳନା କରିବ ।

5. Write Short notes on any three of the following. [5×3]

(a) Placenta

(b) Uterus

(c) Low birth weight baby

(d) Menopause

(e) Obstructed labour.

6. (A) Match column 'A' with Column 'B' [1×10]

Column 'A'

Column 'B'

a) Ectopic Pregnancy

a) Lithotomy Position

b) Short height

b) Reproductive tract Infection

c) Breast feeding

c) Acute abdominal pain

d) Enlarged abdomen

d) High risk pregnancy

e) Placenta previa

e) Dead Foetus

f) Vaginal Examination

f) 14 days of menstruation

g) Craniotomy

g) Pain less bleeding

h) Itching of valva

h) 3rd stage of labour

i) Ovulation

i) Natural method of F.P

j) Placenta Separation

j) Poly hydraminous.

B) Write the full form of following abbreviations. [1×5]

(a) CCT, (b) ECP, (c) S. T. D, (d) P.P.H, (e) IUGR
