*Answer all questions*  
*Figures in the right hand margin indicate marks*

1.

[2+5+8]

- a) What is tissue?
- b) Write down the classification of tissue.
- c) Describe epithelial tissue with diagram.

OR

[2+5+8]

- a) What is alimentary tract?
- b) Draw a labeled diagram of digestive system.
- c) Describe the structure and function of stomach.

2.

- a. Define infection. [3]
- b. Write down the source & mode of transmission of infection. [6]
- c. Describe the role of the nurses in control of nosocomial infection. [6]

OR

- a. Define sterilisation [3]
- b. Mention different methods of sterilisation. [6]
- c. Explain the autoclaving method of sterilisation. [6]

3. Write short notes on any three of the following. [3 X 5=15]

- a) Epithelial tissue
- b) Blood grouping and cross matching
- c) Sterilization
- d) Function of liver
- e) Body cavities

4. (A) Write the role of nurses in the following. [2X5= 10]

- a. Recording vital signs
- b. Fracture of femur bone.
- c. Sterilisation of sharp instrument.
- d. Cerebrum.
- e. Blood pressure.

(B) Fill in the blanks with appropriate words. [1X5 = 5]

- a. Bicuspid valve is known as \_\_\_\_\_.
- b. Capacity of urinary bladder is \_\_\_\_\_.
- c. Myopia means \_\_\_\_\_.
- d. Zygomatic bone is known as \_\_\_\_\_.
- e. Specific gravity of CSF is \_\_\_\_\_.

5. (A) Write True or False. [1 X 10=10]

- a) Right lungs has two lobes.
- b) Increase in number of WBC is called polycythemia
- c) Femur is the largest and strongest bone of the body.
- d) There are 20 pairs of spinal nerves.
- e) Thyroid gland is the master gland of body.
- f) The only movable bone in the face is mandible.
- g) The adrenal gland lies on the upper pole of each kidney.
- h) Outer covering of heart is known as pleura.
- i) Brain and spinal cord are included in central nerves system.
- j) The chemical substances secreted by endocrine gland are known as hormones.

(B). Write full form of the following abbreviation. [1 X 5=5]

- a) PCV.
- b) CSF
- c) BCG
- d) DNA
- e) ACTH
